Subject: 1040 - RE:

Adam = I am picking up a lot of your "small talk" that is consuming not only lots of your brainpower but a whole lot of time much like those fricken religious fanatics who spend their lifetimes immersed in the teachings of the Kabalah and so forth all the while saying exactly what you say although a whole lot more eloquently when also mostly taking up space and equally bad wasting time all the while failing to take action and spread the truths about what Us westerners have done in modern day times that have absolutely fuck all to do with the past let alone when the Kabalah was written, the same with the Hebrew Bible that didn't require some fuckhead rabbi like Professor Abner Rabbi Weiss

and Co. bought and paid for by Nazis such as the Lazarus clan of Durban North, South Africa, "open supporters" of the US backed South African Apartheid Regime, to interpret the word of god that it made absolutely no fucking sense to be doing bullshit stuff like animal sacrifices in order to "satisfy" an intelligent one god, let alone have to go to all the trouble of abiding by the laws of kashrut when you could so very easily look in the mirror and see the increasingly less protruding canine teeth and think it smart not to have to eat meat.

So with all your introspection you are still having the gall to eat stuff that once had a pulse and should you think it smart to now open a debate about a blade of grass having some feint pulse that you and I have yet to detect and that at a minimum it still has DNA then I suggest you jump on a plane right this very minute and join a Jewish missionary in Jerusalem and then have these knuckleheads join me in this "real time" debate.

So what's with all this "fucking" business. It seems like I am not convincing enough that I have to use 4 lettered foul language.

You know that is what kids age 15 do, every other sentence.

At 15, some 6 years after I saw for the first time those mine fields

on the Golan Heights in northern Israel, I had long learned to only talk when I had something intelligent to say.

The least intelligent people but the most "conniving" are those who rely on their "gift of the gab" that they have been taught from the youngest of age to refrain from using foul language as they go about perfecting their use of the "sly English" that certainly works rather well if one's goal is to be "accepted" amongst those hell bent on maintaining the "status quo" which is all about the most average rising to the top of the Bell Shaped educational curve.

The mediocrity is systemic and you don't only have to look in the mirror. Look at Dr. John K. Pollard Jr. and Co. including Devin who all know better.

Tell me now exactly how many email addresses of teachers and professors you have got ever since I spelled out in an email the other day how to reach out to teachers like history teacher Timothy Stiven of Crest High School who while now "deafeningly silent" has to be thinking about not only what his students but fellow professional highly indoctrinated teachers think about his "deafening silence".

BTW how much thought in your Kabbalah investigations have you given to the issue of "water boarding" and how much of a "smokescreen" it is?

By The Way, what prevented you from using the showers at your gym yesterday?

Now check to see how many of those who have spent more than a single moment studying the Kabbalah have to say about the combined efforts of the CIA, British Intelligence and the South African Apartheid Regime developing-manufacturing-distributing biological weapons in to the hands of their assassins who continue to operate throughout the globe?

Do you now consider that your own hands are "blackened" as you have immersed yourself over the past several days in this "nothing talk"?

You do understand that while you perfectly understand why everyone without a conscience "shuts down" once they go to www.just3ants.com and see how very "close to home" I go, by me now preparing to "shut down" it has even people like you so well informed writing total gibberish that of course is not lost on our one most ingenious and so extraordinarily vengeful God.

God helps those who help themselves first and foremost to protecting the space between their ears that first and foremost requires that they pay attention to their food intake and preserving as best they can their god given bodies.

It is brain damaging to suggest that you are also while writing total gibberish beginning to exercise and eat right all the while people your age and younger are committing the most brutal atrocities on a totally innocent enemy who of course cannot be won over with "our truths" such as us westerners represent "freedom, democracy, rule of law, blah blah" [sic] which is why we have to resort to torturous methods not so much to get out of them intelligence which becomes meaningless the instant they are caught and/or go missing but rather to make our own military who don't have "truth and justice" on our side that much more savagery.

The first thing a "savage" does is to stop asking questions.

When last did you think about asking a rabbi why the need to make animal sacrifices in order to please an intelligent God?

Provide me at your convenience along with your email list of teachers and professors a list of rabbis, Christian priests and mullahs who both eat right and break a sweat at least once and a day.

Would you think that if imbecile human beings can create "smokescreens" an intelligent Superior Being would be able to compensate accordingly without having to spell it all out?

THE MEEK WITH TEETH SHALL INHERIT THE EARTH!

Ps - I might be leaving for China tomorrow. And when I return to take an 8 day cruise with Marie from Nuremburg to Vienna aboard the Viking Spirit! Additional stops in Regensburg, Passau, Linz and Melk.

I feel that Kabbalah is the beacon to guide people to seek truth. Once they seek it in their everyday life, they will expect it everywhere.

Fractals: The Colors of Infinity

The Mandelbrot set - someone has called it the thumbprint of God - is one of the most beautiful and remarkable discoveries in the entire history of mathematics. With Arthur C. Clarke as narrator and interviews with a number of notable mathematicians, including Bonoit, Mandelbrot, this program basically illustrates how simple formulas can lead to complicated results: it explains the set, what it means, its internal consistency, and the revolution in thought resulting from its discovery. Asked if the real universe goes on forever, Steven Hawking defines its limit of smallness the Mandelbrot set, on the other hand, may go on forever.
