Subject: SMART POISONS - RE: just an FYI

Adam,

Do u recall me mentioning that you should prepare to start communicating with teachers and professors around the world?

Do u recall me mentioning why it is that we are all living on borrowed time?

Have your ex-coworkers read just what I have put out over the internet over the past 72 hours including spelling all the above out in simple English?

Do you recall our "interactions" the other night at the Il Fornaio bar on the deck of the Del Mar Plaza?

Do you think that New York teacher is the only teacher here in the US who couldn't respond to the information contained on that STORED CD ROM?

Did you see the movie Chalk?

Did you know that the situation in the class rooms of America are much worse.

Teachers have the rotten role, they are in-between the parents and the administration.

Speak to any teacher, start out with all those you meet at your gym and remember the produce section of supermarkets the best place to pick up the healthy less likely to suffer from diseases such as athletes foot and colds spread evenly in gyms.

There was total chaos when I attended high school in South Africa some 35 odd years ago in Apartheid South Africa but you wouldn't have known it unless you were either being literally poisoned or aware of how easy it was for the United States of America's most brutally repressive regime to poison your mind by first intimidating the teachers and then "blackballing" those parents who couldn't be bought for all the "money in the world".

Today it is much worse.

How can a kid maintain their integrity if their teacher cannot judge a piece of poetry for trash.

Have you seen the utter trash the kids write beginning with the spoiled rotten kids counting on their Trust-Hush-Funds to keep them from ever having to really work for a living?

How many kids out there say to themselves that they really have to do what is right for "yourself and I don't care about the rest"?

And it gets harder because everyone wants to be part of the group. It is a whole game.

And if you are average or above, you figure out the game.

It is pitiful you are fighting a system that has been totally morally bankrupt for some 3 generations here in western world, mostly in the US.

A kid has to have a lot of discipline in the home which is now long gone.

This is why the Chinese and Indian are successful, they, who live to learn have a lot of discipline; starting at home, they are forced to learn.

Play is not that important.

Are you waiting for me first explain this all in my book when you have that ingenious Israeli Military Intelligence report already in your hands?

Have you discussed all this with your co-workers?

What about all the women you have come across on internet dating sites?

Yes, I could be a little more subtle to wake up the teachers and professors' kids that the box they are in is not insulated let alone structurally sound to withstand the collapse of the house of cards.

You can sleep on it if you like or how about carrying a sandwich board when running along the beach starting out at Dog Beach, just a couple of hundred meters from your studio apartment?

I bet you would get in shape real fast as well as find the perfect match who would want to know that you are inventive enough to be financially independent without having to lie, steal or cheat.

Keep things general you might say?

Who wants to get all "personal" especially when it is not your skin on the line on the front lines of our oil wars all about the rich trickling down the cost of getting rich on to the backs of the poor who are simply misinformed and not stupid.

More importantly their ignorance is being addressed right this very moment with communications such as this vetted by the world's most wired intelligence services who understand perfectly without having to read in between the lines what was meant when:

Witnesses testified to a catalogue of killing methods ranging from the grotesque to the horrific:

- **"Operation Coast" sought to create "smart" poisons, which would only affect blacks, and hoarded enough cholera and anthrax to start epidemics.**
- **Naked black men were tied to trees, smeared with a poisonous gel and left overnight to see if they would die. When the experiment failed, they were put to death with injections of muscle relaxants.**
- **Weapon ideas included sugar laced with salmonella, cigarettes with anthrax, chocolates with botulism and whisky with herbicide.**

Have you discussed with your co-workers what they think about their own financial security in an increasingly wired world knowing that it was not just the CIA but the

whole fricken United States Congress in cahoots with the South African Apartheid Regimes' biological weapons programme that involved assassins operating freely throughout the world beginning here in the United States, the "Land of the Free and Home of the Brave".

Yes, increasingly harder to mouth all these mantras especially if you are an American service person up against an increasingly committed enemy.

So, you just need to know how to start a conversation by pointing to all those on the "\$ hit list" [sic] that you will recall me saying needs to be updated.

Time to develop art awareness with the community; just typing an email for Marie.

BTW, what did you think of my idea that only US military personnel including veterans as well as their immediate families should be allowed to vote, period?

What do you think of drivers license only been granted to kids no less than 18 years of age who have signed up for permanent force in the US military, bearing in mind that we are currently all very much living on borrowed time.

You are aware that just with that ingenious Israeli Military Intelligence "out there" there is not single teacher, professor, business person, academic, politician including all the corrupt media who can predict the very next moment let alone produce a marketing plan that goes out even a quarter, all the while explaining in simple English, the point of the ingenious Israeli Military Intelligence report, the military report of all time, that questions why Al Quaida hasn't attacked the oil fields of Qatar, Kuwait and Saudi Arabia that in the next instant will paralyze the US economy, apart from even Al Quaida knows better than to bite the hands that feeds it.

Bear also in mind as Marie tells me I "left peanut butter all over the place" from breakfast this morning, that the United States is barely able to feed it owns peoples as the price of oil just at the current level is grinding the US economy to a crashing halt let alone prevent our service people from "turning"; and you wouldn't know if that hasn't already happened given your trust in what your De Beers-Apartheid Government and its equally bought and paid for Madison Avenue, "A Diamond is Forever-A Girl's Best Friend" has to say.

Tomorrow is another day but it doesn't diminish the essence of the Military Report; on the contrary it makes it that much more meaningful as it plays exponentially on the mind of each of our subconscious-conscious.

Time for lunch!

I just had Marie with her most exquisite smile and exotic eyes present to me her awesome skier legs to check to see what she thinks had to have been the smallest of small biting spiders leaving behind the tiniest of red dots that just barely show up against the backdrop of her perfect shape, milk white long muscled legs.

Yes, the hypocrisy of all the puritans out there with so many skeletons in their closets, is now coming home to roost.

What a great time to be alive, fit and well to fully appreciate the arts, beginning with God who Art in heaven!

Subject: just an FYI

I met with some ex coworkers yesterday who told me that the current IT staff is poor and would like to have me come back if I was interested. I told them about my health insurance situation and they said they would push to get me hired. I am not sure of the pay, but I am spending around \$400 a month on meds and that is not including infusions which help dearly.

No coincidences.

Adam
