Subject: EINSTEIN SAID OF JAN SMUTS THAT HE WAS, "ONE OF ONLY ELEVEN MEN IN THE WORLD " WHO CONCEPTIONALLY UNDERSTOOD HIS THEORY OF RELATIVITY

Can you explain why you wish to be removed from my email list?

Does you request extend to any other insight and analysis of the important events of the day that you would prefer not to hear, let alone have your ostrich behavior broadcast over The Internet?

What did you think of the photo at the top of Chapter 4, HOLDING BACK THE OCEANS, showing ostriches hard at work? The hyperlink below takes you to Edward Jay Epstein's epic non-fiction novel detailing the devious nature of De Beers and not surprisingly the Prologue begins, "In Japan...".

<http://www.edwardjayepstein.com/diamond/chap4.htm>

Do you understand the "rules of disclosure", not to mention why you choose to ignore the true history behind the nuking of two civilian Japanese populations within a matter of days, the quickest mass murder in the history of the world by a government not truthful with even its own citizens?

Please put me in touch with Harvard's legal counsel who might have a better idea why Albert Einstein when residing on the campus of Princeton University wrote in 1934 as his return address on an envelope, "Concentration Camp, Princeton" which even the postman when looking at it wouldn't have needed one moment's college education to know exactly what it meant bearing in mind Einstein wasn't exactly a fool and could read as well as write and had a great admiration Afrikaner Field Marshall Jan Smuts whose expert rifle shot guerrillas on horseback would have defeated the American backed British armies in the American-Anglo Boer War 1899-1902 had the British in learning from Whiskey dipped-Cigar smoking American General Sherman laying waste to the farmland, not committed the outrageous atrocity of placing old Afrikaner men, woman and children in Concentration Camps.

Yes, a rather extraordinary brave and brutal "shot across the bow" that was also no doubt picked up by the Jewish Underground fighting the British-Americans for a Jewish homeland in Palestine, bearing in mind that 2 years prior, in 1932, a Kibbutz in Israel was named after devout Christian Jan Smuts, the greatest friend the Jewish People have ever had since Jesus Christ.

Cutting and pasting from Wikipedia – [Jan Smuts](#).

While in academia, Smuts pioneered the concept of holism, defined as "the tendency in nature to form wholes that are greater than the sum of the parts through creative evolution" in his 1926 book, *Holism and Evolution*. One biographer ties together his far-reaching political vision with his technical philosophy:

It had very much in common with his philosophy of life as subsequently developed and embodied in his *Holism and Evolution*. Small units must needs develop into bigger wholes, and they in their turn again must grow into larger and ever-larger structures without cessation. Advancement lay along that path. Thus the unification of the four provinces in the Union of South Africa, the idea of the British Commonwealth of Nations, and, finally, the great whole resulting from the combination of the peoples of the earth in a great league of nations were but a logical progression consistent with his philosophical tenets.

After Einstein studied "Holism and Evolution" soon upon its publication, he wrote that two mental constructs will direct human thinking in the next millennium, his own mental

construct of relativity and Smuts' of holism. In the work of Smuts he saw a clear blueprint of much of his own life, work and personality.

Einstein also said of Smuts that he was "one of only eleven men in the world" who conceptually understood his Theory of Relativity

As a botanist, Smuts collected plants extensively over southern Africa. He went on several botanical expeditions in the 1920s and 1930s with John Hutchinson, former Botanist in charge of the African section of the Herbarium of the Royal Botanic Gardens and taxonomist of note.

You would also know from your studies that during World Oil War II, Smuts was second-in-command to Winston Churchill and would have taken over from Churchill in the event Churchill became too incapacitated from his dark dog days drinking whiskey, not smoking pot or wine that I am aware of, or in the event of Churchill's death which didn't mean that at any time during WOW II, Jan Smuts was close to being a "potted plant".

For President Roosevelt to know that DeBeers who we all now know play all sides of war, to have infiltrated the highest levels of the British War Ministry so would Smuts have known and at the same time known there was nothing he could do but try and help the Jewish people "ride it out".

Again, just a very basic knowledge of modern history would let you know that Jan Smuts had a long history with De Beers beginning with the fact that Jan Smuts was at one time immediately prior to the outbreak of the American-Anglo Boer-Farmer War, the right hand person of Cecil Rhodes, the founder of DeBeers who got the backing of the British and American Government to go to war with Jan Smuts when Smuts realized that Rhodes was a treacherous bastard.

That war was the Anglo-American Boer War of 1899-1902.

Let me know if you need any help understanding my American English.
