Subject: To Dershowitz from John Loftus

Dear Allen,

I assure you that I have nothing to do with these people, and that I do not support their conspiracy theory in anyway. They were never authorized to cite me or my work in support of their theory and it is a fraud for them to have done so. I have repeatedly asked them to take my name off their mailing lists, as I do not want anyone to get the impression that I endorse them in any way.

Truth be told, one of the group has a history of mental illness, and his family claims that the best thing is simply not to respond to any more of their emails. Be prepared for very abusive and defamatory denunciations however.

Hope you are doing well. May I call you sometime and bring you up to date on some of my latest projects? Hope all is well with you and yours during the holiday season.

All the best,

John Loftus

Received from Internet:

Dear Harvard Professor Alan M. Dershowitz,

I apologize for not replying sooner to your enlightening email, but I think that you will appreciate that I have taken your advice in doing some additional reading.

In 2000 you wrote the book The genesis of Justice and as far as I am aware you continue writing the Justice Column for Penthouse Magazine whose former Vice Chairman Kathy Keeton was well known to Gary S. Gevisser's mother when Ms. Keeton-Guccionne was a stripper at the Butterworth Hotel across from the Durban, South Africa train station where attorney Nelson Mandela was responsible for masterminding a bombing that killed innocent civilians who were not as well informed as Mr. Mandela about De Beers.

The proof of Mr. Mandela's "feigned ignorance" choosing very carefully not to go after De Beers who well prior to the Bretton Woods Conference of July 1944 quite obviously owned everyone and everything, all very clearly spelled out in Wall Street Journal editorialist Edward Jay Epstein's, The Diamond

Invention, a non-fiction novel first written in 1978, the year Gary S. Gevisser arrived in the United States of America armed with a "letter of introduction" that not only gave him an "audience" with De Beers one set of attorneys on Bush Street, San Francisco but a "nothing to speak of job" at De Beers principal money laundering and diamond currency price fixing operation on US soil.

Your age and education is no excuse for ignorance, the same with Mr. Mandela who joined the ANC in 1944 prior to the conclusion of hostilities in Europe and before the start of the 45 odd year reign of the South African Apartheid Regime.

Your decision, however, to "read me the riot act" while choosing so very carefully to ignore the facts of the United States of America's pivotal role in the suppression of the overwhelming majority of Black South Africans as US business interests headed up by American Charles Engelhard with the most extraordinary close ties to the US Democrat Party and most all the Kennedy clan is a sin you are going to have to bear the rest of your natural life.

Moreover, I have never been to planet Chomsky, but I have seen right and wrong here on earth; or "black and white" as you referred to it. I think perhaps you have spent too many years in the legal system and lost your ability to differentiate from all the shades of grey.

I assure you that Chomsky played no role in my letter nor had I read a single word of his prior to your accusation of plagiarism.

We can argue semantics and how far back the word "today" was referring with regards to the number of casualties from genocide, but I would hope that your book response to my letters "inaccuracies" includes a response to the Israeli intelligence report which was so obviously the meat of the letter.

So ingenious isn't it?

The royalties from your book I will assume will be spilt evenly between you, me, and Gary S. Gevisser.

I find it interesting that out of all of my "nonsense", you chose to respond to something completely irrelevant and asinine to the point of the email.

To that end I now personally share with you all my communications (<http://www.just3ants.com/FamilyTrees/TuckerEdLois/default.shtml>) with my very black handed money family that includes a pedophile yet to be brought to justice, although there is nothing quite like Public International Attention to stop bad things from happening; if there is a will, there is a way.

You are reading and critiquing like a professor. Educated or not, I feel pity for those that become stagnant in their own minds.

Back to your subconscious, are you ready to share your thoughts on the Israeli Intelligence Report?

Have you read The Diamond Invention, moreover Ch9 &Ch18 which feature documentation made public by the freedom of information act, and documents the close relationship that De Beers had with Hitler and the Nazi movement

which as you know had strong roots in the US.

May I also suggest reading some of John Loftus' reports; as you know Loftus was a former US Justice Department prosecutor who made his 15 minutes in the mid 80's by exposing the US governments in particular the CIA having Nazis on the payroll.

As you know Israel has a long memory.

Why do you think Israel attacked the USS Liberty during the 6-day war when the war was for all intent and purposes already over and the USS Liberty was totally defenseless operating against the best interests of the State of Israel albeit in International waters?

Moreover, the lack of investigation worth talking about by the US Congress that smacks of course of one most epic cover-up speaks volumes.

IAF was able to take out the air force of Egypt, Jordan, and Syria in approximately 4 hours; do you really think that a force that strategic and calculated would mistakenly attack a supposed ally?

Why did the US tell the UN that they had no ships within 350 miles of Israel? Moreover, why would an Israeli ally send a SPY ship to come to Israel's defense?

These are all FACTS that were not lost on Israeli Intelligence but it is no surprise that an academic such as you would choose to overlook them before replying to my "nonsense".

Shame on you professor and all those who look up to you.

I wouldn't suggest you go back to Hebrew school but I do suggest you try and buy up every copy of your Genesis which Mr. Gevisser purchased for 50 cents this past Saturday at a church sale.

Sincerely,
Adam L. Tucker

P.S. Don't you just love email and the record that it leaves As you read in my dialogue with my family who no different than most, are so use to being able to talk their way out of their problems and distracted by trying to remember all of their lies, that they forget one email to the next, what they have said. In addition, there is the factor of never knowing who is in the Blind Carbon Copy.

Subject: Re: Darfur - China

Youth and good intentions are no excuse for ignorance. There are so many factual errors in your letter that it would take a book to answer. Only on planet chomsky is the world so black and white. I will point out only one piece of blatant ignorance: your claim that there os more genocide today than ever before. Where do you come up with such nonesense. Do you have

anyu idea how many people were subject to genocide between 1920 and 1945 bu the soviet unoion and nazi germany? Do youi quote facts on when they serve yuour ideology. You are entitled tyo uyour opinoons but not your facts. Start reading real books. That is road to being an independent thinker , not parroting chomsky.

Subject: Darfur - China

Dad,

Why did you decide to donate money to Darfur?

Were you aware that Darfur is the Sudan's third civil war since 1955? The last one was encapsulated in a documentary called GOD GREW TIRED OF US; but was basically about the mainly Muslim North against the mainly Christian South. I am assuming that you didn't hear of it, because we didn't have the same media coverage or celebrities rallying against it as we do now in Darfur.

There is another interesting documentary which is about Darfu, called THE DEVIL CAME IN ON HORSEBACK. At the root of it is a now retired US Marine Captain, named Brian Steidle whom commanded some 300 marines, and expected that US military as well as the world would step in when he reported what he was observing, back in 2004.

As you know I have always asked a lot of questions; with the case of Darfur, I am asking why are we hearing about it now?

As you would probably know, there have been over 400,000 reported deaths in Darfur, and many more without homes. But did you know that the Sudan's previous civil wars had more than 1.9 million deaths.

At the time of their first and second civil wars, the Sudan was controlled by the British. Did you know that the Sudan is very rich with oil and gold resources? ...still such a poor country for having such valuable resources.

Why does there always seem to be civil war where natural resources are discovered? And moreover, why is there always another country such as Great Britain and or the US supplying weapons?

So getting back to the question of why is there NOW such public awareness of this genocide as opposed to the other genocides going on in the Congo, or South Africa? The answer lies in who is now getting their oil from the Sudan and why we would want them to have a tarnished image.

Have you noticed an upsurge in the awareness of bad products being imported from China? In this year alone, since China has started to revalue its currency and diversify its portfolio away from their US\$1trillion in US Treasury Bills and into other markets; first our pets Kidneys were destroyed by tainted pet food, then shortly after, we started having recalls on toys that were being imported from China (I believe for leaded paint) and then cardboard in toothpaste as if that is necessarily bad, especially when compared to aspartame in pretty much everything.

Haven't we been importing goods from China for a REALLY long time? Why are we having problems, or rather public awareness of problems now?

Considering this is not China's year in our public eye, you would also not be surprised that China is heavily invested in Sudanese oil much more so than any other nation.

But isn't it strange that of all the manufacturing in China, we are still the largest weapons manufacturer in the world? Why do we need to manufacture anything else so long as we make the guns? You would agree, a surprisingly similar dynamic to that of our local gangs flexing their gun power. How deadly would Darfur be if they were throwing spears or rocks? And better yet would we hear about it?

Look at our history, war has to start on our soil first in the media, before then providing conflict to rally around.

Now that I have your attention, I want to address questions that I have heard from you and the rest of my family about what it is that I want them to do.

The answer is first to be honest; It makes it much easier to see things in black and white or right and wrong, when you aren't busied with shades of grey as I know we have all been. You have to first define what wrong is before you can make strides to stop it. I think most would agree that at the source of the conflicts around the world seems to be money used to "allocate resources". So why not chase the money trail to see who is stealing the most and from who?

You know even without reading Edward Epstein's The Diamond Invention that diamonds are not only a currency, price fixed by DeBeers, the price fixers of price fixers at always more than a barrel of oil but such currency is totally untraceable; moreover Diamond Currency is in fact also unlimited in supply and being lightweight can be transported back and forth using small diplomatic pouches as they have now for more than a century; no wonder government officials, elected and non-elected don't want to shut down DeBeers, the mafia of mafia for fear it will interfere with their gravy train.

Most of you don't want to make waves because you are living a comfortable life, BENEFITTING FROM THIS CORRUPTION that of course the elected and non-elected government officials trickle down first to the richest who get them elected in the first place and second not to be so stupid as to shut down DeBeers, and SO why jeopardize your fictitious so very blood stained lifestyles when you can continue doing what you are doing, even though you are aware of such truths as I am force feeding you. The problem is that our complacency has allowed for what we are seeing now with the collapse of the US dollar, the genocides not able to keep up with advances in technology, specifically information transfer to those masses yet to be brutally murdered who are now beginning to wake up BIG TIME thanks to work of VERY CREDIBLE people such as Gary Gevisser EXPLAINING all this in "real time".

You, my father made a comment to me about always thinking of me as an independent thinker and being disappointed that I was focusing on world problems rather than putting money in my pocket. How are my actions not consistent with being an independent thinker? Especially, when considering, my family as with most, are doing the opposite of me and focusing only on themselves and caring for their own? A better question might be when have we solved enough of our own problems before we start helping others?

How many grassroots organizations are out there to take money donations, yet there only seem to be more problems to throw money at? If we have been

throwing our money at the problems for so long with no solution in sight, when do we realize that it is only helping our conscience?

Do you not see the benefit of keeping the masses busy in their minutia and knowing just enough about the world to think that they have it figured out and don't need to ask any questions?

What is wrong with questioning the status quo especially when the world is at war, with us in the center of it? Don't you want to know why we are fighting, which includes looking for weapons of mass destruction that never existed? Are you not curious as to why we are in Iraq if it is so obviously not for WMDs? And next, why is our price of oil still rising if we are there just about the oil?

Have you ever thought about the fact that the US is the only nation that has ever used Weapons of Mass Destruction and it was against civilians' none-the-less? What kind of message did that send the world and would be foes?

I saw a History Channel show that talked about a tyrant king called "Vlad the Impaler"; whom had a relatively small but strategic kingdom. He earned his name by having wood spikes placed around his castle and then had his military impale his own civilians on these spikes to send a message to his would be attackers that if he is this brutal to his own innocent people, G-d only knows what he would do to them. This actually worked in keeping his kingdom secure for more than 8 years without actually having to fight.

How often have you heard someone say, "let's just nuke them!"

Why are there more genocides going on now than ever before? Who benefits from keeping the masses ignorant and dead?

So why is China on our radar?

- 1) China owns an unprecedented US\$1 trillion in our Treasury Bills which gives them the ability to collapse our dollar at anytime were it not for the threat of our military who could move into a place like the Sudan at a moment's notice.
- 2) China has a military 3 million strong that because of its overpopulation regulations implemented some 15 years ago, is right now at its peak size, which due to these population regulations will only diminish over time.
- 3) Israel has been realigning itself with China by sharing military technology and training China's soldiers which places a threat on our ability to apply pressure and control over the Middle East.
- 4) Finally, and most importantly there is Israel's not so Top Secret Military Report which features China so prominently and states the following:

Immediately following the 2008 Olympics in Beijing China, Al Quaida will launch a series of attacks on the oil fields of Saudi Arabia, Kuwait, and Qatar which will immediately paralyze the United States economy.

With our Achilles heal exposed in this report, one has to ask, why Al Quaida hasn't already attacked just one of our oil fields especially in Osama Bin Ladin's self-proclaimed Holly Land of Saudi Arabia, if his whole reason for

attacking us was to get us out of Saudi Arabia. How much less complicated would it have been to just attack one of the many helpless oil supertankers as opposed to flying hijacked commercial jets into our World Trade Center Towers?

But then again, look at all the money that has been spent on this war.

More importantly is the fact that 80% of the cost of war is oil that is coming from the Middle East, placing more and more pressure on the military option.

Again some 80% of the cost of war is the cost of fuel which keeps our money going to the Saudi princes' "Holly land".
Have you heard of the phrase "don't bite the hand that feeds you"?

When is it time to question?

Go to just3ants.com and look at the ongoing dialogue between US Marine Captain Brian Steidle and Gary Gevisser with a whole lot more folks than just Israel's Mossad and Israel's Military Intelligence looking in.
