Subject: JUST CUT IT OUT - NO DOUBT - i take care of my wife's many needs

Dearest Teri,

You are something else.

Please thank the doctor for his concern.

On second thoughts, given how the surf is rather choppy which is exactly how I like it when swimming although on the wave ski it isn't quite as pleasant, forgive me if I vent, just a little.

Interesting that you would, before communicating with Marie, decide to speak with chiro Dr. Sebastian, let alone draw conclusions such as, "her conditioning and being closed minded, blah blah" [sic]!

Again, why wouldn't you communicate directly with Marie if you were so concerned?

It is none of Dr. Sebastian's business to be discussing my wife's condition, let alone breach her patient-doctor confidentiality, wouldn't you agree?

You do recall this scandal some half a century ago in Britain involving a call-girl and a member of the British Parliament when the high-class prostitute responded to a belligerent prick of a lawyer, "Wouldn't you agree?"

If you don't know the details please do a Google Search and if necessary consult with Dr. John K. Pollard Jr. who also has too much time on his hands waiting in

great anticipation for my forthcoming book all about empowering the kids to parent the parents who need the most help and then "sum" [sic].

What do you think of the idea that I have a very short introduction following a dedication to the so very missed, so soft to the touch, so cuddly, so very funny character Pypeetoe, followed by a cartoon series that begins with vulture looking eagle and beneath each cartoon there is wording to describe the in-the-works 1 ounce Gold Coin American Eagle terrorizing the peoples of the world?

Look when you have a value system that is empty you have to at least maintain a sense of humor.

Shows quite a defensiveness on the part of Dr. Sebastian, wouldn't you agree?

Shows, at a minimum, quite unprofessional!

What do you think about your doctor talking to another patient about your medical problems?

Why would he be so concerned that Marie get a second opinion?

BTW the orthopedic and this quack chiro were not the only doctors that Marie consulted with on this very bad fall.

Marie takes her health very seriously and perhaps that is why she is recuperating so very fast, although she is not "al-to-get-her" [sic] out of the woods.

Healthy mind, healthy body.

If you were diagnosed with cancer wouldn't you want to go and get a second opinion, just to make sure or would you just lay on the table and say,

"Just cut it out!"?

Did you know that Marie was once married to The IT, a no longer, thank God, practicing pathologist.

Do you ever worry about the two dogs he bought his "tTOo" [sic] kids who refuse to pick up their business #2?

Does that tell you anything about their passive aggressiveness, and what would you do about it apart from calling up someone like Dr. Laura who might recommend military school?

Not that it is any of your business to judge Marie's decision of going or not going, just like it is not any of your business whether you decide to go visit this quack chiropractor, or how about make love to the Dali Lama?

Now if this is all too much for you perhaps it would help to let you know that I have yet to eat lunch all the while having expended a great amount of energy thinking of ways to support President George W. Bush who like no other President in the history of this war mongering nation has not only been attempting to do the right thing but at the same time tell US Americans who cannot handle the truth, the truth beginning with why it is that so very few of us have a moral conscience that inevitably results in an inability to logically thought process, hence the extraordinary "deafening silences" I receive from all those whose formal education has interfered with their learning resulting in them quite comfortable when taking the easy way out as "easy come easy go" to not lose any opportunity to usurp their limited authority and have local law enforcement descend upon me as if I was Attila The Hun.

Are you not totally embarrassed as an American citizen to now read about 1 out of 99 American adults are in prison, making us the United States of America the police state of police states?

Yes, I know perfectly well that you are at your "wits end" having read not only about the combined operation of the CIA and the South African Apartheid Regime known as "operation coast" but I have already underway a communication going to each and every teacher and professor throughout the world making them fully aware of the facts of these beyond belief atrocities that went on for 45 odd years by both the CIA and South African Secret Police not just in South Africa but throughout the world which were not exactly unknown to the Mossad.

Just in case you can't get enough of seeing the written word, you can click on the hyperlink that follows:

- **"Operation Coast" sought to create "smart" poisons, which would only affect blacks, and hoarded enough cholera and anthrax to start epidemics.**
- **Naked black men were tied to trees, smeared with a poisonous gel and left overnight to see if they would die. When the experiment failed, they were put to death with injections of muscle relaxants.**
- **Weapon ideas included sugar laced with salmonella, cigarettes with anthrax, chocolates with botulism and whisky with herbicide.**

<http://www.nextraterrestrial.com/pdf/Microsoft%20Word%20-%20dempster-madd.pdf>

Then again you had to have no doubt your head where the sun doesn't shine all that brightly, not to know that when I was growing in South Africa under the brutality of the South African Apartheid Regime for some 21 years, shy of one week, it was the 3 Branches of the United States Government in total command

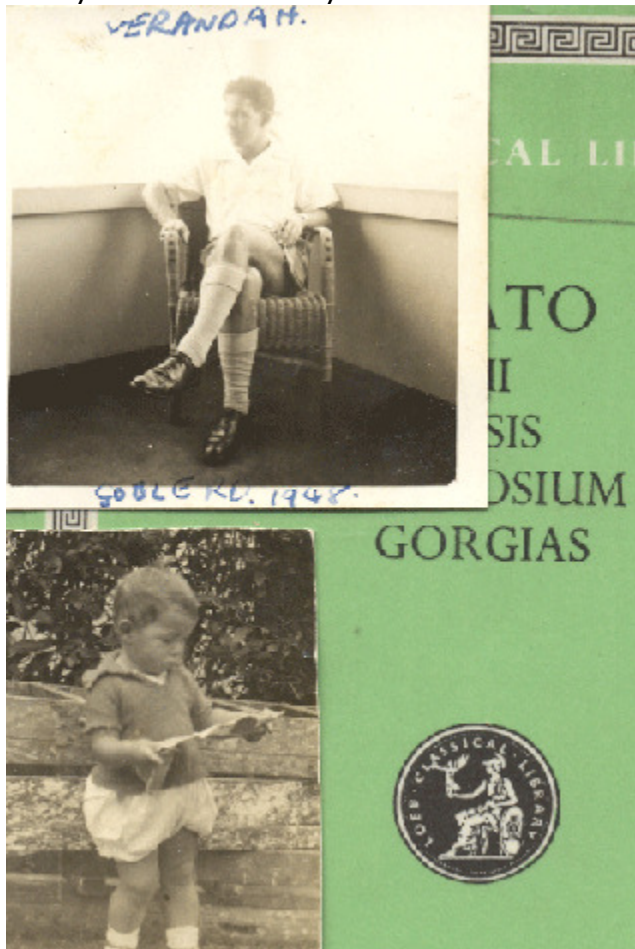

and control of this most repressive, most violent, most racist, most anti-Semitic, most anti-Christian, most anti-Muslim regime in the history of the world.

Yes, a United States Government totally non-representative of its mostly hard working peoples who understood perfectly that the CIA were working with the South African Defence/Offence Department in engineering-producing-distributing biological weapons on each and every opponent of the US' Apartheid Regime.

You recall the one letter I refer to on occasion from Dr. Michael Moshal MD, that he sent me on February 24th, 1981 some 10 months prior to dying of lung cancer at age 45, never once having smoked a cigarette. Click hyperlink below:

<http://www.nextraterrestrial.com/pdf/Mike%20Moshal%20-%20Feb%2024%201981.pdf>

More importantly, it was Dr. Michael Moshal MD whose father was my father's family doctor when my Dad

was growing up also in Durban, South Africa, who informed me of this not in the least bit covert biological weapons programme that the Apartheid Regime in conjunction with the CIA were executing throughout the world including here in the United States, and why it didn't take very brilliant gastroenterologist Dr. Moshal MD

whose eldest son obtained two specialties in medicine before giving up entirely the practice of medicine to become an internet entrepreneur, to figure that the cause of my liver function tests coming up "abnormal" was the result of a concerted effort to poison my liver which he was able to trace back to 1980 soon after I arrived in New York City to take over from uncle David Gevisser as the American head of the De Beers-Anglo American Cartel.

Not to mention that Dr. Michael Moshal MD was not, however, the first person to inform me that my granddad Al Ash had also been poisoned to death, the medical diagnose, "cirrhosis of the liver" absolute garbage.

To mention little of my strong as a horse mother's father, dead at age 63, never having taken a sip of alcohol, something my Royal Mater-Mother encouraged me not to do from the youngest of age.

To mention in passing, as a low flying small dark red helicopter flies by, Michael Moshal like me knew that his "discovery" was not going to be lost on the Apartheid Regime who travel freely throughout the world and when not using diplomatic pouches know exactly who can be "relied upon" beginning with their own assassins

who none of us know from a "hole in the wall".

but at the same time with the entire world increasingly wired those assassins are feeling increasingly isolated; and more importantly, those giving the commands increasingly reluctant never knowing who is listening all the while increasingly aware the Mossad are not exactly "brain dead", not even close.

Yes, all this privacy stuff is part of the brainwashing of the dumbest people on the planet, congregating here in the United States, present parties excluded, and no wonder when one looks at all those running for elected and non-elected government positions those of us who can think realize there is no difference between them, all bought and paid for as well as being stupid, and why we as well as they are better off, if not using the internet to vote on every issue even if it is the wrong vote, then to at least be smart enough to have the Chinese breed and raise our children.

Bear in mind no matter what, the world is going to be Chinese, thank God; and then who will US Americans, in particular, blame for the dummying down of the already so dumb American people given how the Chinese not only speak English - China will be the largest English speaking population in well under 10 years -but these people who "live to learn" versus us who "live to eat" and "make money", continue to set the scholastic levels wherever they go.

Don't you feel utterly stupid when now asking someone trying to seduce you, "How do you make money?" even if you express it differently as in, "How can I also make money just like De Beers who laugh all the way to the bank?" as you have sleepless nights worrying about the day ahead battling to make a living when not taking out your frustrations on poor, poor, poor Gary Steven Gevisser who has been now for more than 8 years pulling out all stops to give us all, rich and poor, stupid and bright, a "heads up" that we had just better accept that peace, while it is war to those who profit from war that is not confined to the battlefields of the world but the fight over resources including healthcare, is worth fighting as well as dying for, agree?

Not to mention, each day I wake up here either at the cliff house or at our stone home, I feel like I have "died and gone to heaven" and when death finally arrives I will feel perfectly at home.

Do you feel the same, that what goes around comes around with a vengeance; and if not, can you explain yourself in simple clear, clear sentences.

You know I haven't taken a single course in psychology but I am very well Charm School trained, as well.

Would it help if I were to tell you that our one quadriplegic friend Michael who broke his neck I believe some 2 decades ago and now in his 40s, says,

"Breaking my neck was not a bad thing!"

So do you think you have "sumthing" [sic] to offer China other than the fact that you who teach people with reading disabilities such as yourself how to read, are demonstrating that you have a problem both reading and writing; at least that is my observation, but managing, however, to having produced, and I think you might on occasion give thanks to God without thinking for a single moment you are God, God forbid, two very hard working kids who I would like to see more of an improvement in the way they are raising you, period.

I had decided not to pursue matters further with Dr. Sebastian, but now I will think otherwise and will take counsel first with my very excellent court witness so irresistible, so very cute French speaking wife who you will recall me mentioning jumped some 2 classes because of her command of mathematics, let alone has a degree in business-marketing from a university that doesn't give kickbacks to students who haven't yet full control of their Trust-Hush-Funds.

I can't wait for Danielle, Marie's 18+ year old daughter to drop out of college so that I can then proceed to help each and every one of the faculties improve their curriculum starting out of course with "operation coast" biological warfare programme all part and parcel of having the rest of the world's best and brightest race their way to our shores in search of the Almighty Dollar.

Notice even you are no longer thinking of the words, "Freedom, Democracy, Liberty, Justice", but how about that awesome word, "truth"?

No, you are still thinking, "Love of money" still sounds good, maybe!

Feel free to place Dr. Sebastian "on notice".

Gary

Ps - Was there anything you found interesting in the "I TAKE CARE OF MY WIFE'S MANY NEEDS" 804 word email I sent earlier to Dr. John K. Pollard Jr. , an alumni of Cornell University and MIT, yet to give up his MIT email address, that is now uploaded on my blog at www.just3ants.com; and of course, have Dr. Sebastian visit there regularly and to be sure to check out the "**\$ hit list**" that I think you would agree needs updating?

BTW, Dr. Sebastian recommended Marie to fix her spine, not her pain which was in the tail bone area, that she start with a 12 course treatment for what he referred to again and again as Marie's "curvature of the spine".

Not to mention MDG made sure to stand up and take away the "power position" from Dr. Sebastian standing up blocking my view of Marie's x-rays.

To mention little of Dr. Sebastian so very quickly losing his "bedside manner" when Marie told him,

"I not ready to be manipulated. I want to take my x-rays to an orthopedic surgeon!"

Again, it is one thing in this "dog eat dog" non-vegetarian world to "lose it" when your patient seeing you for the first time doesn't buy into your bs, but to be so fricken out of control to discuss a patient's medical condition with another patient who for all I know could be a member of the Mossad, is stark raving nuts.

BTW did Dr. Sebastian share with you his Liability Insurance coverage, and if so would you, without feeling the need to bother me again, just forward it to Ron Bellows of AIG and have Ron who is a very senior risk management consultant for the world's largest financial institution with signage on the skyline of Hong Kong, do an assessment to determine whether Dr. Sebastian has both adequate and proper insurance coverage?

There is no need to rush things since I am going to be turning off my computer for the remainder of this 3 day weekend, which I would like to now make official given what I plan to unload first thing this coming Monday, possibly Tuesday, all depending.

Not to mention, that Dr. Sebastian, a very, very, very poor read of his audience couldn't do quite enough to make poor, poor me feel like I was a "potted plant".

To mention little of the fact that when one comes across two individuals such as Marie and me whose combined age totals 100 with bodies that demonstrate most of all that we know a thing or two about not overeating and eating very healthy, all the while exercising sufficiently that we don't feel the need to be touched by strangers although I can understand that US\$50 can still get one a "blow job" on Hayakon Street, Tel-Aviv, Israel.

To mention in passing, I am of course passing the time right now to get the "green light" from both the Mossad and Israeli Military Intelligence before broadcasting my two remaining heavily broadcasted emails and then focus exclusively on my forthcoming book, THE HISTORY OF MONEY CREATION AND ITS FUTURE!, subtitle, A Message for the President.

Equally important, Marie's pain is going away just as highly skilled and experienced South African trained orthopedic surgeon Dr. Norman Kane MD suggested it would without either to repeat, a highly skilled and knowledgeable medical doctor or for that matter a quack chiro placing a hand anywhere near her most perfect and may I add "irresistible" body.

BTW do you get a "kick out" of Dr. Sebastian telling you and your daughter, "resist me!" followed shortly thereafter with, "I am going to manipulate you!"?

By The Way, would you know if Marie and I are the only two people who have visited with Dr. Sebastian who consider him so very unprofessional that now has you placing your non-medical reputation so very much "on the line"; bearing in mind I have yet to ask Dr. Norman Kane MD, who is called upon time and again to provide expert witness testimony in court cases involving medical malpractice whether he and/or his colleagues have encountered others such as highly intelligent and so very well touched MDG having a "problem" with more than Dr. Sebastian's so pitiful bedside manner?

Not to mention that Norman, a pretty close neighbor of mine from Durban, South Africa has been living in the States some 32 years, two years longer than me, who went to school with his younger sister, Noreen; and of course Noreen and her attorney husband in the penis, no strike that, penal colony of Australia are blind copied.

BTW do you agree that US Americans are getting dumber and it has nothing to do with illegal immigrants?

It is better to keep quiet and let people think you to be a fool than to speak out and remove all doubt - Proverbs.

Being a Sperm Donor or Sperm Recipient does not make you a good parent – Marie Dion Gevisser

By The Way, Marie just returned from teaching her art class and is now on the remote phone with her brother Andre in Montreal, laughing and joking of course in her most perfect French, all the while walking ever so light on her feet about the art and love filled now most beautifully painted and renovated studio cliff house, enjoying the picturesque ocean view, just a handful of surfers out there right now.

Not to mention, I just overheard the words, "Trust Funds... pro surfer... trainer" followed shortly thereafter by "Starbucks", and now Marie is smiling her patented most beautiful smile at me while describing the morphine induced very troublesome EKG reading I had following my "bout" with a kidney stone that were it not for my so very on-top-of things most sexy French-Canadian wife understanding the "Catching" medical profession, would have me very likely by now wearing a pacemaker.

BTW can you imagine if we were to move to Quebec how I might get in better shape by shoveling the 3 meters of snow they have received this winter?

You do recall how Andre Dion was responsible when retiring from the Royal Canadian Mounted Police and stationed at the Canadian Embassy in Washington DC, arranged for the most beautiful, in great shape Black female Secret Service Agent to provide us with a private tour of the White House before I think Marie, Pypeetoe and I traveled on to Peru, but I could be wrong; again I need to eat as well as catch up on water drinking?

So what do you think of the Swastika shaped US Navy building still standing on Coronado Island built in 1967-1970

Does it matter to you that back in 1938 when Princeton University Freshmen voted Hitler the greatest living human being and Einstein, second, that anti-Semitism in the United States so "late in reacting" to the Holocaust, was rampant; facts of life, talking very loudly to how Jewish people around the world beginning with United States Jewish people, are only Jewish when it suits them to be Jewish, not lost on Israeli Military Intelligence who authorized on June 8th, 1967, 2 days in to the brutal 6 Day Arab-Israeli war for the brutal Israel Air Force and Flotilla 13, Israel's most fearsome Maritime **Special Forces** unit to unleash their brutality on the totally defenseless USS Liberty spy ship operating in International waters in a region of the world where the US had, and continues to have no business in being there, apart from fermenting civil wars amongst peoples who own a good chunk of the oil that fuel the US' oil wars so necessary in maintaining a big government-welfare dependant society, easily reflected in the epidemic obesity which brings me back to asking you again whether you are aware of the study that shows the correlation between obesity and dementia?

Not to mention, that US Americans and the world should only thank God for having as our President at this time the very fit, healthy mind-healthy body President George W Bush who with so very few allies around him has managed to pull off one miracle after the next beginning with the fact that when he took office those of us as clued up as me about the dire straits of the American economy, believed that nothing short of a miracle would prevent the US **from propelling** in to the most bloody civil war as envisioned by Bill "Rhodes-DeBeers Scholar lawyer" Clinton in his infamous and bizarre ending speech on January 21st, 2000, with year left in office, pointing a finger at US Americans, "Don't bother pointing a finger at me because I told you that the United States was ripe for a Bosnian style ethnic cleansing civil war", and yet more than 7 odd years have passed and how many others apart from me give Mr. Bush the credit he deserves bearing in mind two things:

First, that "grace period" is now over. There is a price to pay for those who fall asleep at the wheel; you snooze you lose!

Second, US Americans have no one to blame but ourselves for allowing the buildup of the out-of-control military-industrial-complex that supports the lack of personal responsibility that first began taking root some 3 generations ago at the turn of the last century.

And of course you wouldn't know about all that because it is not part of your "make up" to search for the truth, far more comfortable in blaming just one person doing the most thankless job which you will recall me mentioning has the President of the United States not taking vows of being moral but rather to print money without any backing apart from the military mite of US Armed Forces, again yet to confront a first rate military such as China and Israel, and then to declare war on those nations-people who refuse to accept US-De Beers-Dollars as legal tender.

Yes, the fact that most Jewish people in the United States support the big government policies of the Democrat Party whose figureheads have for more than a

century been prominent players in the Diamond Invention, is not simply a disgrace but perfectly understandable.

Hypocrites are found in all the religions including academia, the new corrupt church.

When you are all about "money, me" it doesn't take very long before you will sell your next of kin to get what you want.

Of course I should now stop, now that I have been given the "green light" to proceed.

Finally, would you be so close to Dr. Sebastian to know the fat cell count of each of his patients as well as whether they have an active sex life or just think US\$50 is a cheap price to pay for being touched while hearing mumbling words, "You are fighting a cold!", when doing the absolution cross?

This quack is nuttier than we thought. Earlier, while waiting for the "go ahead" to begin broadcasting both communiqués that include an explanation of how very easy it is going to be achieve "peace in our times" just focusing on the genius of Israeli Military Intelligence gathering, our very together landlady just dropped off a letter saying, "Just one letter, nothing very exciting!", Merna most interested to know whether Marie is back to painting.

Not to mention that MDG's oil painting, "The Rooster" goes on auction at an upcoming Rotary Club auction to be held at the Rancho Sante Fe Inn Hotel. I promise to keep you apprised once I know the specific date. I believe the starting price is US\$3,500 although Marie may have decided to increase it.

BTW, do you agree with Marie that the photo I included of me with my shirt off in the email I sent journalist George Andreassi II this past Monday when I was both Marie's chauffeur as well as tea orderer, was "unsightly"; bearing in mind that I haven't really worked out since my kidney stone ailment about some 6 weeks ago when I had only just begun to get in the rhythm of things following the passing of Pypeetoe, in the very prime of life, on June 28th of last year?

<http://www.nextraterrestrial.com/pdf/Microsoft%20Word%20-%20andreassi-page.pdf>

Health is everything especially if I am unsuccessful in bringing about a worldwide peace and the United States of America is forced to introduce the military draft to replace the economic draft and I suggest that every person who can feed themselves and who is not taking care of someone who can't feed themselves is forced to sign up, and that would of course include you and your children.

And guess what, the letter is from Dr. F. Scott SeBastian. He's trying to get Marie as a patient still!

It reads:

February 25, 2008

Dear Marie,

I would like to welcome you to my office and acknowledge your first exciting steps toward the recovery of your health through chiropractic care. You may have already tried aspirin and pain relievers and discovered that they only cover symptoms temporarily and do nothing to correct the cause of your problem. Once they off, the pain and other symptoms return. Correction of the original cause is what we want. We want to help rid your body of discomfort once and for all!

In our office we see patients with a variety of health problems that respond to chiropractic care. As a new patient you will inevitably have questions about treatment and care and I do want to take a moment to address myself to you. Your health and questions you may have about a family member or loved one is an important part of our work. We take great pride in what we do and always want to be here for you. Like it was in the old says... the doctor really cares about the patients' needs.

I may take the liberty of writing you again about important phases of your treatment and care. But in the meantime, I would like you to do me a great favor; if a friend or relative referred you to our office, please pass along my sincere appreciation. Helping others is what a doctor's life is all about.

Thank you.

For your best health.

Dr. Scott Sebastian, Q.M.E.

Teri, I can't thank you enough for referring me and Marie to Dr. Sebastian, if for no other reason than it helps greatly in increasing the circle of those dependent upon my insight and analysis of the important events of the day.

Again, thank you. I am most appreciative.

This e-mail is intended to reach 40 million people worldwide!

Be a link in the memorial chain and help distribute this around the world.

Don't just delete this. It will only take a minute to pass this along.

Subject: Re: I TAKE CARE OF MY WIFE'S MANY NEEDS

Dear Gary,

Your subject title impels me to write to you. I spoke with Dr. Sebastian and he told me that he provided your wife with a complete exam for free. And that commits me to him for life...He did XRays that showed there was no damage to tissue and that it was likely that one adjustment would fix your wife's back pain. An adjustment costs \$50, much less than other practices, and Dr. Sebastian is very successful in treating back pain, as he has for both Kelly and I. Marie said she did not want his services and would rather see an orthopedic surgeon. Why? Is that reasonable? Why go to a doctor for help if you have no desire to listen to his advice?

Needless to say I am very disappointed that Marie would rather be in pain than spend \$50 to have her back adjusted.

It must be her conditioning and being closed minded to new therapies that she was not taught about in school. Or is it something logical that I do not know about?

It is likely that the orthopedic doctor can do nothing in this situation.

With best wishes,
Teri

Subject: Re: GRATEFUL

Dear Gary,

Dr. Sebastian does do x-rays at his premises and would probably want to do them given the situation. If you go this month, then if you say I referred you, he will give you a free \$130 exam.

David and Kelly are so busy with school and other outside activities that they have no time. But thanks for asking.

Do you know any newspaper people who might be interested in a program that removes most reading problems in 3 months time, being trained for only 30 minutes twice a week for 12 weeks? I have been advised that is the next best step.

They can first go to my website: www.pathtoreading.com to learn more.

I think that Marie should definitely see Dr. Sebastian. The first visit will cost almost nothing and his treatment is very effective, especially for back problems.

With best wishes,
Teri

Subject: GRATEFUL

Marie and I are thankful and heartened that David is "grateful".

We are waiting to see how Marie feels tomorrow morning before going down the medical path. Do you know if Dr. Sebastian does x-rays at his premises?

And yes this email account seems to be working just fine now since I was fortunate to find a lady supervisor over at ATT-SBC who knew better than to give me the "run around".

I still want to suggest to both your very hard working kids how very easy it would be for them not only to make good money on the side but at the same time not compromise their principals.

Below is an email I sent an Italian barman friend of ours on Thursday.

Subject: SEMINAR- practice - think about your children and grandchildren - photos "1:54" [SIC] pm pst

Davide - I will send you something tomorrow more precise that I would be talking about in a 2 hour seminar-workshop with a 20 minute break.

It could be good business for Pacifica or Il Forniao and they might want that? Pacifica have a really good room just across from Gerard.

Again, I would split all the net revenue with you, and we can think about a charge that would make economic sense. You do some "shopping" and get back to me.

Realize that for all those "working for a living" and/or who are invested in real estate and/or the stock market and/or co-dependent on Trust-Hush-Fund, "time is of the essence".

This seminar-workshop will spell out the "solutions" to the problem facing all those being compensated in US Dollars and who do not "add value" to the betterment of humankind that begins with the U.S. Dollar increasingly exclusively dependant on the ability of the US military to force the rest of the world to accept our Dollar as payment and at the same time the US military is paid in US Dollars and those US service people on the 130 US bases scattered throughout the world pointing our big guns at our tyrants head, they are first to "feel the pinch" which brings me back to that good question I put to my friend Augusto who is a highly educated Peruvian guide:

Why do you think Mr. Chavez hasn't simply cut a deal with China to get all of Venezuela's oil and in return get state of the art technology, a customer whose currency is on the rise and military protection at the same time without worrying that China's Special Forces Commandos would "turn"?

I think that and what follows is a good start.

Dear Gary,

I was so sorry to hear of Pypeetoe's untimely death last night. I know how hard it must be to lose someone so dear to you all. I loved Pypeetoe and he will be missed by so many people.

I send you my love and good thoughts.

With best wishes,
Teri
