Subject: DAAC ALLIES...EvoL

Dear Mr. President,

I know this may be a really bad time for me to be disturbing you, and so I first apologize knowing, however, that it is possible your Chief of Staff would think it important to share this with the First Lady who may be busier than your entire cabinet and so maybe in addition to all of you Mrs. Cheney might care to join us "online".

I could try instant messaging Brian Gavin of Harvard Business School Publishing but since I know he is constantly online with email I prefer to extend my sphere of influence; i.e. increase the circle of those dependant upon my insight and analysis of the important events of the day, by encouraging others such as Cheryl Daigle, Personal Assistant to **Dean Jay O Light** of Harvard Business School or **Professor Bose** of Harvard's History department who is away overseas and may not reply to email while so courteously leaving on his automatic email reply, letting me know,

If you are writing about graduate studies in History, please contact Gail Rock (grock@fas.harvard.edu). For other History department matters, contact Cory Paulsen (paulsen@fas.harvard.edu). If you are writing about the South Asia Initiative, please contact SAI's Assistant Director Rena Fonseca (rfonseca@fas.harvard.edu) or our staff assistant Ian Jackson (sainit@fas.harvard.edu) or phone (617) 4964862.

It is hard for me to say exactly what jobs all those hired post 911 would be doing today.

It is equally hard for me to say what jobs these same people would be doing if they and you were not constantly making us aware of the threats of terrorism that once eradicated places us in not that much different position than when eastern European Jewry were flooding in to places like Germany creating all sorts of competition problems for well established Jewish and non-Jewish business people just because these poor and very frightened human beings "saw fit" to escape marauding Cossacks, apart from, of course, there are less open spaces these days to hide and more of us competing for exponentially decreasing natural resources beginning with oil and water.

Both the Church and the State understand the role human overpopulation plays in each one of us being increasingly "un-neighborly" and of course would prefer not to be reminded especially by someone such as myself who is not simply very credible but extraordinarily "wired".

The purpose of the communiqué is to continue with my **Educational Light Journey-One Tribe of Achievers** seminar-workshop.

It is also hard for me to say exactly why the price of gold in the spot market just leaped approximately US\$10 about 3 hours ago reaching some US\$714 a troy ounce, last trading at US\$711.60.

Perhaps it was nothing more than the 2 hours I spent yesterday "dialoguing" with Brian Galvin trying to sell him on my forthcoming book **THE HISTORY OF MONEY CREATION AND ITS FUTURE!** and of course to encourage him and his co-workers, friends and family to attend my first combined seminar-workshop with Adam Tucker, my one American programmer who is making progress all the while looking at the most balanced and important alpha-numeric equation known to humankind, the oxymoron of all time, which Einstein, very slow to "dis" religion, referred to as "**The Mind of God**" given it unimaginable "precision", spending the rest of his life when not assisting the Jewish Underground in search of what he believed would be the equally "certain",

"Hand of God".

Not to mention that more likely the Trustees of Harvard University, after first protecting their personal balance sheets, are now hard at work to secure Harvard's endowment from the inevitable collapse of the capital and financial markets.

To mention little of the role of the **DeBeers-Anglo American Cartel** who remain optimistic that they can "**weather this storm**" given how very deeply "**imbedded**" they are in our societal structure beginning with academia who would prefer that I don't remind them yet again of the **Top Secret Israeli Military Intelligence Report** that spells out in very simple language that Al Quaida will launch a series of attacks on the oil fields of Qatar, Kuwait and Saudi Arabia

immediately following the 2008 Beijing Olympic Games that in the next instant will paralyze the U.S. economy, making for starters “tenure” at a university say in Timbuktu worth a whole lot more than say any one of our Ivy League Universities never to forget as well the London School of Economics, Oxford and Cambridge University.

To mention in passing the **DAAC** who understand my intimate knowledge of **The Diamond Invention** also recognize that adding to their paralysis is their not exactly omnipotent power, increasingly waning with each tick of the clock as I as well as my highly “wired” friends remain not only alive but extraordinarily “tapped in”.

Mr. President, it would be pure folly to forget that long before I became rather expert in the use of Israel’s most reliable close-armed combat weapons such as the Uzzi submachine gun

again designed to rapidly fire 9 millimeter bullets that wouldn’t penetrate walls and cause collateral damage to innocent civilians, I would wake up each morning in South Africa and be worried to death about the safety mostly of my mother who while extraordinarily deceptive left so many “signs” which at times I wondered whether she had “**lost her mind**” and yet at the same time it was very obvious that neither my very aware father or my 3 elder siblings had a clue about why for example my Royal Mater

-Mother when still just 19 years of age and married less than 3 months to my good looking

and virile father

would,

*From the earliest days of **1949** she visited Israel two and three times a year writing reports for different publications. Her paternal grandmother had been an early resident of Tel Aviv only returning to England when Zena was born. The Gevissers (she married Bernie Gevisser when she was 19 after only a few months in Durban) owned land in Haifa harbour and Zichron Yscov and she rapidly felt at home in Israel.*

Reporting on the many wars when Israel was attacked she was the first civilian in the captured area of the Sinai and in later years at her own expense twinned Durban with Eilat. In 1978 she left Durban eventually making her home in Netanya [Israel] and England.

We all know the expression, “**Cannot see the forest for the trees**” although I prefer what I once heard in a Santa Monica court asked of a judge by a male Public Defender:

“Question: If a man speaks in a forest and there is only a woman around, is he still wrong?”

I have already explained numerous times to Adam Tucker and others why it is that very intelligent people like my math-wizard French-Canadian wife get bored very easily and nothing more boring than someone who is repetitive and why such individuals so very quickly in life get so bored, thank God/G-d, studying the so repetitive Bible which I recognized perhaps earlier than most that this was once again the genius of God pointing out His-Her “**difference**” with the totally corrupt priesthood in all the religions including academia, the new and most corrupt church.

Once I pointed out that **c**, the speed

of light, is only a “constant”

in the “perfect vacuum of Deep Space” much like a vacuum tube, the same with humans who have allowed the space between their ears to be interfered with by morons who make it their business-personal to create all sorts of short-circuits in the next generation of mindless humans that has these future dogs chasing their tails forgetting why **G-D-Nature** that us doubling, “**replicating religiously**” got rid of our tails for good reason, in the very next instant without me going in to any detail about Einstein also being one of the pioneers of Quantum Gravity-Physics-Mechanics that while not quite as precise as S-G Relativity causing our computers to “crash”, in a nutshell requires that everything goes “forward” as well as backwards — www.EmanANDdog.COM - is the essence of the Digital Age where we have the number 1 and 0 repeating themselves ad-infinity, no different to “**2 c mE**” in “reverse”, Marie Dion Gevisser simply remarked while quickly moving on to the next subject,

“It (Special-

General Relativity) proves out both **Creation** (**The Hand of God**) as well as **Evolution**.

We all not only understand how a “dimmer switch” works but without sunlight nothing can grow let alone evolve.

Both the corrupt Church and State depend on “conflict” which only begins to explain the “**deafening silence**” right now of all academia, church officials and their co-dependant corrupt State.

[Adam Tucker](#) is mostly responsible for the layout of my one website www.NEXTaterresTRIAL.com that displays toward the top the words

“Sum
Things
Are
Built tTOo
Last” [sic].
Evolution?

In the time it has taken me to type this heavily broadcasted communiqué my stunning, beyond belief sexy walkin, talking work of art very excellent artist painter **F-C** wife who, forget for the moment her awesome mouthwatering body, firmly believes that despite 10 years of intensive study with Sebastian Capella she cannot hold a candle to his out-of-this world's genius, then again Sebastian has been painting daily for than 60 years, has showered, dressed, put on minimal makeup, walked to the counter top, thrown in the trash bin under the sink a couple of

seeds of multigrain bread that were left from breakfast earlier this morning - so meticulous without ever being pedantic is **MDG** in everything she does never having to return time and again and waste time doing "pick up" apart from all the time she wastes her breath picking up for others mostly her "tTOo" [sic] kids who don't know any better because they both still believe it is mighty fine to "**take the money**", now looking at me with that trademark look without having to say, "**You are not writing about me?**" and in the same time it is possible that not one but two sniper bullets fired by possibly US "contractors" playing all sides to the conflict in Iraq and Afghanistan have either killed or permanently maimed a U.S. soldier, causing immeasurable "collateral damage".

Yet Adam Tucker still feels the need to "digest", not distracted in the least that the two dead and/or permanently injured leave behind a family increasingly "**waking up**" to why it is that so many of us have so much time on our hands to whine and putter around.

It would be a good thing if starting today each and every golf course not just in southern California but throughout the world stopped their watering at least until such time as there is not a single gun shot heard anywhere in the world and each and every one of us goes online to confirm such an awesomely wonderful event apart from all the golfers.

Now at least one more American serviceperson is now dead and another permanently crippled for life and their buddies on the battlefield remain human enough to commit for every US death on average 50 more unmentionable atrocities on innocent civilians increasingly, however, "**waking up**" to what us **DAAC** Allies are doing in that part of the world; a fact of life not lost on Israeli Military intelligence beginning when hearing well in advance that **DAAC President Franklin D. Roosevelt** was meeting on board a US battleship with **Ibn Saud**

representing the **DAAC House of Saud** immediately following the atrocity of the Yalta Conference that began 2 days following the Soviet Red Army liberating the death camp of Auschwitz on February 2nd 1945.

You may remember that on this day my dad was “*resting up*”.

His prior mission, operation 23 to “**D.B (Dive Bomb) AMMO DUMP S. OF SPILAMBERTO**” using two 500 pound bombs on January 31st 1945 was a “**very successful op!**” lasting 90 minutes; his logbook recording also the following:

**‘PIGEON’ LED 8’s. THERE WAS 10/10 CLOUD AT 4000 OUR SIDE OF THE LINE!
MY BOMBS JUST OVERSHOOTNG HITTING ROAD. THERE BEING MANY HITS.
MADE 2 STRAFFING RUNS ONE DUMP BLEW UP OTHERS BURNING – VERY
SUCCESSFUL OP**

Flame-Throwing Raiders Driven Back

ADVANCED ALLIED H.Q.,

Saturday,

PATROLS were again active along the entire length of the Italian front.

An enemy patrol which attacked Eighth Army positions with grenades and flame-throwers west of S. Alberto on Friday was repulsed. Another clash took place south of Route 9 in the Tebano area. Two of the enemy were killed and two wounded. We suffered no casualties.

South of Cuffiano a German party which attempted to attack a house was intercepted and dispersed. There were grenade fights in the mountains north-east of S. Clemente early on Friday. On Fifth Army's right flank a

patrol found a group of houses near Furcoli fortified and strongly defended. The patrol inflicted casualties on the Germans in a short fire fight.

There were several fire fights on the central sector and reports of digging and position preparation.

A German raiding party 20 strong was repulsed by artillery and mortars west of Route 1.

Out in 1,000-plane strength for the seventh straight day, M.A.T.F. aircraft again hampered at enemy fuel supplies and communication lines in Italy and Austria to-day.

Waves of R.A.F. Spitfires and S.A.A.F. Kittyhawks raided the Salsomaggiore oil fields north-

west of Parma in the outstanding attack of the day. Great fires and explosions that sent clouds of smoke as high as 7,000 feet followed the bombings. The Salsomaggiore area is now the most important petroleum producing area in enemy-held Italy.

In another strike at oil targets, Thunderbolts started 12 fires among oil storage tanks west of Verona.

D.A.F. Spitfires, Mustangs and Kittyhawks and 12th A.A.F. Thunderbolts concentrated on cutting rail lines and strafing rolling stock in north-east Italy. Early reports showed 160 railcars, 40 vehicles and eight locomotives destroyed or damaged and rail-lines cut in 40 places.

Bernie Gevisser's next operation, mission 24 took place on **February 6th, 1945**, "**D.B. THREE GUNS SOUTH OF BOLOGNA**" carrying again two 500 pound bombs.

NO.3 TO SYD (COHEN). SAW A GREAT DEAL OF A.A. AHEAD OF US OVER TARGET. ALSO SAW GUN FLASHES ON GROUND! HEAVY A.A. AROUND MEL & MYSELF AS WE WENT DOWN -THEY ALSO SENT UP SOME LIGHT AA AS WE WERE DIVING - SO STRAFFED! I NEVER OBSERVED MY BOMBS AS I WAS TOO BUSY GETTING OUT!

I stopped a long time ago getting sick to my stomach over human stupidity once I figured out that the only thing preventing my amazing fighter-bomber-pilot father and Dr. Syd Cohen MD who took over as Commander of Israel's first Squadron during Israel's War of Independence when Modi Alon was killed, from bombing Nazi Germany's concentration camps such as Auschwitz butchering some 10,000 mostly Jewish people a day that went on at a feverish pace after D-Day June 5th-6th 1944 when my dad and the rest of Allied Squadron 11 were "**clicking their heels**" in the sands of Idku, Egypt waiting to go into battle above the skies of northern Italy which is where the heaviest of fighting was just beginning, was what Field Marshall Jan Smuts and David Ben Gurion would decide to do next apart from the Jewish Underground working feverishly to secure weapons including fighter planes for the most important battle that the **DAAC** Allies in cahoots with the **DAAC** Nazis never expected to last more than a few hours.

That gap - my wife just mentioning that the garbage truck is coming down the lane splitting 10th and 11th Street in heavily city council and real estate agent-broker corrupt Del Mar, California fast running out of water, to pick up the trash and right after, "**I cant wait for him [Jonathan to return from surfing]**" just as I see him walking back from surfing with his new but dinged surfboard under his arms],,, JoNathan now running up the steps of our cliff house just as his mom says, "**I am making you an egg and then I am out the door (to art class with Sebastian Capella)**" – of some 3 odd years, between **June 8th, 1945** when **DAAC Nazi Germany** surrendered to the **DAAC Allies** and **May 15th, 1948** was a busy time for the Jewish Underground who weren't exactly "**asleep at the wheel**" even prior to the outbreak of **World OIL War I**, one year following the establishment of the **DAAC's US Federal Reserve** in 1913.

Not every Jewish person who witnessed the wholesale slaughter of Jewish people by gangs of marauding Cossacks on a night out on the town slitting the throats of Jewish people is stupid.

Nor was my great maternal grandmother Nechie Badash, a very close confidante of Ben Gurion corrupted by witnessing her entire immediate family being wiped out when age 8.

To some of us there is no price for selling our souls.

Adam Tucker is immersing himself in mathematics and science at the highest levels that people like Einstein figured out more than a century ago without the use of computers let alone supercomputers.

Adam Tucker is an individual who can choose to do whatever he wants, the same with my wife, the same with her son Jonathan who has very little to think about apart from surfing given how extraordinarily easy it is to get by at school and at the same "please" both his mother and monster of a biological father Dr. John Ben Stewart MD who is now on the road driving Danielle to college.

Along with 3 hundred dollars for Danielle to get her own hotel room on the hazardous road trip I included in the envelope a 5 gram gold bar that my Royal Mater-Mother handed to me in Zurich, Switzerland

back in December 1967 after she found her handbag which she had simply left at her hairdresser.

The bar is encased in relatively hard plastic which in turn is attached to a rather worn “**certificate of authenticity**” and on the back is space for the “bearer” to assign “ownership”, space for I believe up to 10 owners and then of course one can keep adding names by attaching more pieces of paper.

Last evening I placed in the first space the date 9/10/07 to the left of my name and to the right, my signature.

It should be fairly easy for Danielle to figure out that this document is a “promissory note” backed up by gold bullion.

It is doubtful, however, despite all the years of schooling that this well above average knowledgeable human being would recognize what I have gifted her as very similar to money which she may not know is nothing more than a promissory note backed up by the government but unlike this promissory note all money-legal tender issued by the U.S. Government has no backing of gold beginning on **August 15th, 1971** some 5 odd months after the Mossad assassinated American Charles Engelhard, the American head of the **DAAC** leaving my uncle David Gevisser as the executor of this most important, beyond belief rich mineral estate.

Long before Charles Engelhard journeyed to South Africa back in the late 1940s Engelhard Minerals and Chemicals out of Newark, New Jersey started by his father in 1902, the same year Ernest Oppenheimer arrived in South Africa and began with the help of American bankers such as JP Morgan to consolidate the **DAAC**'s stranglehold on the world's monetary system, the Engelhard's were sitting in the “**pound seats**”.

One did not need to be a member of the British War Cabinet as was Afrikaner Field Marshall Jan Smuts, just prior to the outbreak of the DeBeers-Anglo Boer-Farmer War of 1899-1902, the right hand man to Cecil Rhodes, founder of DeBeers, to know how it came to pass that Charles Engelhard would end up inheriting from his father the title, "**Platinum King**" all the while "based" in the United States and by the time Charles was laid to rest at St. Mary's Abby Church, Morris Town, two words, New Jersey on **March 2nd 1971** with **Senator Ted Kennedy**, former **President Lyndon Johnson** and **Vice President Humphrey** instructed to attend, the estate of Charles Engelhard now controlled the entire world's supply of platinum that within a handful of years would skyrocket in value as the United States Congress mandated that a piece of platinum be placed in every new automobile sold in the United States.

It is doubtful Mr. President that you have met my nebbish uncle David Gevisser handed some US\$6 million following Senator Kennedy, President Johnson and Vice President Humphrey "shaking in their boots" but you may have at one time shaken hands with Ernest Oppenheimer's grandson Nicholas Oppenheimer whose father Harry who died in 2000 once had a memorial website that was soon taken down as I began to bring Public International attention to why it failed to mention Harry's crime partner Charles Engelhard who was assassinated at the relatively young age of 54 without of course the **DAAC** media making a big deal.

My long time pal Tony Leon,

leader of the South African Democratic Alliance Party which serves as the token opposition to the **DAAC** controlled ANC government was also forced to pay a “tribute” to Harry Oppenheimer and when I read it I wanted to vomit because of how very close to home it is.

Tony Leon is a very brilliant and courageous lawyer who remains to this day the only White South African who has ever told me the truth about the evil and most awesome “Money Power” of the **DAAC**, the mafia of mafia, but Tony was overmatched.

Moreover Tony when he shared with me his most inner thoughts when we were visiting together back in 1995 at my Royal Mater’s one-of-a-kind bachelor flat at Heron Water

on Clifton Second Beach, Cape Town with the rounded glass shower that my very athletic wife

may have possibly forgotten but not me, was not only feeling very relaxed but “safe” having no clue of my “**Money Power**” connections although of course he knew that my Royal Mater

didn't get off a boat just yesterday from Leeds, England where there is no port but lots of expertise in the "**clothing game**".

Tony also knew that my mother was now remarried to Alan Zulman a maverick multi-millionaire who made his fortune in the "rag trade",

And if you are still not exhausted after reading about those lively people meet...

FOR MOST South African readers, Zena Zuluani is a well-known figure. Her husband, Alan, has grown a pigtail. Both indulgences are the delightfully colorful predictions of an always elegantly dressed South African who, as a result, have been affectionately dubbed by friends and colleagues in the tag back as "the odd couple."

"So what if they call us the odd couple," laughs Zena. "I'm having the time of my life. And I know that Alan is, too."

The attractive, brown-eyed, curly-blond who is visiting Durban from England, contends that there is something of the squarer in practically every woman. Some of us collect dolls, she says. Others collect jewelry or china figurines while many more simply accumulate recipes and knitting patterns.

"I'm mad about hats. And I'm so glad my little Jewish religious observance make it necessary for me to wear some sort of headcovering on every social and outdoor occasion. It gives me a wonderful excuse to indulge my mania."

In her home in Somerset, Zena has something like 60 or 80 headcoverings in widely varying shapes, sizes, colours and materials. These have been collected from all parts of the world.

THE MAD HATTERS

Photographs by Terence Barrett

Zena and Alan Zuluani...bopping red pigtail is one way of getting attention!

Some of the most exciting have been acquired over the last year, which for her has been "the divine experience of a second honeymoon."

"Don't I know it!" wails South African clothing tycoon husband, Alan. "She's got more fun than Joan Collins. I've just finished making a new cupboard in which to store them all."

ZENA is the former Zena Giverson, well known throughout Southern Africa as the initiator of professional training schools for models in this area.

Like most big enterprises, Zena's schools had a small beginning. They started in 1967 with a simple course of lectures to help adult women in Durban overcome shyness. The response was so enthusiastic that she was soon encouraged to expand the course to include good housekeeping, fashion, beauty and attractive deportment.

The school in Durban appeared to fill a very definite need among women of all ages and it wasn't long before she was prevailed upon to open similar establishments in Pietermaritzburg, Johannesburg, Cape Town, Windhoek and Salisbury (now Harare). Their was

even one in Ekurhuleni in the old Congo! Zena had a regular slot in a women's radio series and she also wrote a column on beauty in an Afrikaans newspaper.

For the next 25 years or so thousands of students were trained by Zena. Some of them became top "South African models" and trendy queens. Among the latter was Nancy Cooper—now Penny Penny—who won the Miss World Contest in 1986. Another signal success was Cecile Harman, the first international model who, through Zena's agency, had the privilege of working for Royal couturier, Norman Hartnell, and various other top fashion houses in Europe.

"But all that is in the past," Zena says. "I enjoyed those days and they're good to look back on. But today is what counts."

She bubbles vivaciously. "Do you know what I've discovered in the last year or so? It's that life doesn't begin at 40, as they say, but at 60! I'm nearly that age and I'm having an absolute ball!"

For the last two years she and Alan have been touring the world on what they happily describe as "an extended honeymoon." They were married in a romantic ceremony on the top of Mount Zion in Israel in May, 1984. It is a second marriage for both of them and their joy and happiness in one another is king.

By Eve Short

Zena collects hats wherever she goes—gold lame head-covering from London, gold cap from Pilsen Beach, California. Blue cotton peaked cap from Brussels, Belgium.

pride that love and marriage can be a good, if not better, second time round.

ALAN is a retired industrialist, co-founder of a giant nation corporation now known as South African Clothing Industries.

He took early retirement because 11 years of building up the business was not without stress, which began to be ruinous to his health.

"I decided I didn't want to be a rich man in the country. I wanted to live and do all the things I've always dreamed of doing—tour the world, see new places, meet new people. I can't tell you this last year has been just magic to mark his 'liberation' from 11 months' prison. Alan gives his pigtail 17 days gone by when Chinese men were into bondage they cut off their pigtail. Well, I've done the reverse. I'm liberating so I've grown a pigtail which, he adds with a mischievous twinkle, 'has been most admired by a good many ladies!'"

Mind you, there might be some at last my mania for hats and Alan's pigtail really odd; and the fact that we're old hands just for the sheer joy of being together, but who cares? We're having the time of our lives and we both intend to keep it up until we die."

Living it up means travelling at the high summer years to halfway place with exotic names on exciting, but in that provide chance to widen their horizons and increase their knowledge of the world and its peoples. Living it means going out to meet life in all its moods, phases and happenings, a discovering the wonder and fascinate of it all.

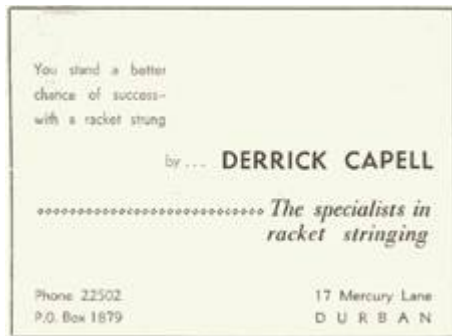

And of course, wherever she goes means, every now and then, a new hat. Zena.

"But Alan doesn't mind. 'What I love,' he says, 'is the way she's got a most beautiful hat open face in the world.' And does hat collecting excite him, too?"

He roars with laughter. "I've a collection. But I'm so busy in Jan. longish. My dear, don't you think that's mad hats in the family is quite enough."

Women's World May 1988

Alan one of the youngest "self-made" multi-millionaires in South Africa following at age 15 having to leave high school when his father died in order to support his mother and sister who were left poverty stricken despite a filthy rich uncle who started Beacon

Sweets and whose first operation here in the US was in Newark, one word, NJ.

But Tony had no idea that just days before I had returned from Johannesburg where I had met with my uncle David Gevisser the day after I had met with Trevor Manuel in Pretoria.

It is possible that you have also shaken the hand of my pal Trevor who back in 1995 was South Africa's Minister of Trade and Industries and today Trevor is South Africa's "heralded" Minister of Finance as dumb as he ever was.

Both JoNathan and **MDG** have now left the cliff house, JoNathan making a point of showing me his latest high chroma multi-colored wetsuit, and it is relatively quiet, just the sound in the distance of a buzzing saw but I have yet to open the front side windows which once I do the awesome sounds of the waves will pretty much block out all distractions.

Just before leaving for school I asked JoNathan to give me a US\$5 note he had scotch-taped together after a school kid had thrown it on to the ground after having accidentally torn it in half.

According to JoNathan there were approximately 10 other kids his age all hanging around when this one kid thinking the money was now worthless simply tossed it on to the ground believing it not only to be trash but that someone else would pick up his trash.

Moreover, the other kids began to make a joke about going to the schools' cafeteria and making out like they were going to buy something and when placing the order hand over the torn money and walk out without saying a word.

Remember these are not two year olds but 15 year kids attending one of the better public school districts in the country.

Of course it is to be expected that all the other kids apart from JoNathan also thought the money to be trash and in sync with mob mentality wouldn't dare stoop so low as to even bother picking up the two pieces of "trash" and then take the effort to find a trash can.

Once all the kids had finished having a "good time" JoNathan then picked up both pieces of "trash" and without consulting me or his mom promptly taped them back together.

Because of the perfect job he had done I wasn't able, at first, to see where the tear had occurred.

Just in case you are interested the serial number reads: **DB 06738958B**.

Perhaps our Treasury Secretary would see fit to use this as an example of how good a job each of our Treasury Secretaries and Chairmen of the United States Federal Reserve have done in getting people like JoNathan to believe that not only does money "**not grow on trees**" but it is still a valuable "**promissory note**" even though all it has is the backing of the word of elected and non-elected government officials who so very few of us trust beginning and ending with the fact that in the course of the past century not one elected or non-elected government official has even lifted a finger to "rebuke" the **DAAC**, the counterfeiters of counterfeiters let alone instruct the CIA, "**off with their heads**".

I have of course been doing other things today besides for writing you this very important communication.

The time is now 1:51 PM and gold last traded at US\$712.60 and it is not only the Secretary of the Treasury who is very concerned should the **DAAC FAIL** to crash the gold market as they did beginning on **January 21st 1980** when I was already working for them but had yet to join Codiam Inc. on 47th Street, the world's money laundering and intelligence gathering capital.

Mr. President, I believe it is important as I now also prepare to respond to U.S. Attorney John Loftus Esq. who maintains that I have yet to deny his public allegations that I suffer from a mental disorder that I repeat what I began broadcasting on Tuesday, September 04, 2007 at 1:00 PM PT to **Sherri Hendricks** of the **DAAC's Rappaport Report** following Ms. Hendricks "**call to arms**":

Before either one of you or anyone else carbon as well as blind copied get "**too carried away**" with your own "self-absorption-importance" you should all know that Ms. Hendricks works for Hasidic-ultra-orthodox Jewish-Black Hatter **Martin Rappaport** of the **Rappaport Report** who I would regularly break bread with when he would come over to the **DAAC's** principal money laundering and intelligence gathering operation, Codiam Inc. on 47th-Wall Street where after of course kibitzing with Stephen Cohen and his partner Alan Lipworth, Alan and Stephen now not exactly "friendly", this most corrupt of the corrupt **DAAC Black Hatters** would receive the fixed pricing for "**cut diamond currency**" marketed and sold not just in the United States but throughout the world which Mr. Rappaport would then publish in the **DAAC's Rappaport Report**, all again taking place on United States soil.

It is also my understanding that Mr. Rappaport spends most of his time these days in Israel.

Furthermore, I am just finishing up a response to another faculty member at Harvard University which should have you all continuing to “sit tight” while of course watching closely the trading of currencies including Diamond Currency.

Gold up about US\$10 with the all important Hong Kong market set to open in less than 4 hours.

[Word count **209**]

Worth also repeating as you think that much more about immediately suspending the trading of shares in public corporations thereby protecting the “naïve” the words of Ms. Hendricks that triggered my “knuckleball” response:

I can’t agree more! I had to set up a mail option to send anything and everything from his address to my junk folder. I have even talked with him and asked him to remove me from his list but he won’t. I wish we could do something about it.

Worth also repeating what her comrade Professor Jagdish Bhagwati of Columbia University had to say that “triggered” Ms. Hendrick’s call to “chop off my head”:

Does ANYONE have an idea how to STOP this ranting character from sending his rubbish by e-mail to us? It arrives almost daily!!! Is there some agency to whom we can refer him and have him fined and/or worse? My repeated attempts at telling him to take me off the e-mail list have FAILED.

Just minutes earlier my gorgeous wife **Marie Dion Gevisser** returned from her art class and when so gracefully walking up the stairs declared in her very sexy French accent.

“Sebastian did 80 percent of the painting (nude). I told him ‘I know you are having fun!’ He said, ‘I wish it were only bigger so that I could show you more colors.’ It was a good lesson and that is what he is there for. I am happy.”

If you are following along you might be surprised that I am still at our studio cliff home having decided after our quiet dinner celebration with the two kids to spend the night.

Sincerely yours,

Gary S. Gevisser

Subject: DIAMOND CURRENCY

Charles & Richard,

I was doing research online and came across something you wrote that I wanted to inquire about.

In your piece about the Kimberly Process (http://www.ruby-sapphire.com/kimberley_process.htm), you collectively wrote

The very idea that diamonds are somehow to blame for atrocities in Africa is ludicrous. Unlike the trade in weapons and drugs, where a very real cause-and-effect case for a shot of mace can be made, the trade in precious stones features no such smoking gun. Diamond is an inert substance. It cannot kill anything.

I agree that a diamond is no more dangerous than a piece of lead until the moment it is placed into a gun. I do not wish to get into a discussion of semantics, but how can you devalue the role of diamonds in their capacity to be universal untraceable currency?

Have you read THE DIAMOND INVENTION?

If nothing at all, please take 5 minutes to read the following <http://www.edwardjayeinstein.com/diamond/chap9.htm>

Thank you for your time,
Adam Tucker

Subject: "Computers and the Apartheid Regime in South Africa"

In your collective studies of the Apartheid Regime in South Africa, did you come across any interested information about diamonds?

Have any of you read THE DIAMOND INVENTION?

<http://www.edwardjayeinstein.com/diamond/chap9.htm> Chapter 9 is particularly fascinating because it describes how the Debeers Anglo-American Cartel allowed its well secured industrial diamonds to be sold to the Nazi party for 80% above market value. If you know anything about the diamond business, you know that their business model relies heavily on the ability to artificially regulate supply and demand. There is no black market for diamonds since you can't steal something that has never been inventoried and is untraceable.

Bill Clinton was a Rhodes scholar; studied at Oxford, and on a fast track to power. Ehad Barak quite publicly advocated the pardon of Marc Rich, who fled the US in 1983 to avoid being prosecuted on charges of tax evasion and illegally making oil deals with Iran during the Iran Hostage Crisis in 1979-81.

Why would Clinton have any reason to Pardon Marc Rich?

Why was an Israeli Prime Minister PUBLICLY advocating Marc Rich's release?

What message would be sent to observers?

Why did Israel or the United States have any association with the South African Apartheid Regime?

Subject: Re: EvoL

I was reading more of an Einstein Biography and I finally understood the importance of his awareness. Energy is a spectrum encompassing everything from radio waves to our known existence with everyone and everything made up of energy. Our existence is based upon our creations devised to manipulate energy in the form of our perceived environment. Should our awareness of our environment evolve so will our self-awareness and ultimate return to raw energy. Is this why you refer to the connection between $E=mc^2$ and God?

By the way, why did you stop typing "G*d" for "God"? Dis your perspective of the world change?

I need to go through this process in order to digest everything.

Adam
