Subject: Part XI - WOW - Germany the largest exporter.

Mr. President,

I am speeding things up a little following my having "slept" on my one American programmer Adam L. Tucker, very much in tune with the heartbeat of the universe but still carrying more than his fair share of the weight of the **world** on his shoulders, replying to me yesterday, "No changes" to my question,

Tell me if any of your "wows" or "not wows" have changed once comparing the data in the above hyperlink to the one you gave below. Mark any changes in the color red.

<http://www.nexttraterrestrial.com/pdf/atucker-export.pdf>

Mr. President, if you were to ask all the literate people in the world over the age of about 14, possibly less, to list the world's largest exporters, the overwhelming majority without first doing a Google search would say China, followed by India and then a whole host of countries and even if you were to repeat the name "Germany" a couple of times they would look at you first strange and then say that Germany is way down the list.

I knew Adam L. Tucker would go and do a Google search and it was confirmed by his decision to send me an internet hyperlink.

Then again, I went back providing him with another hyperlink to see if his choice of the biggest exporter, "United States", would change, and that is when he came back with "no changes", although he may have been simply letting me know that his "wow" and "not wows" hadn't changed in reference to this one email I had sent Hylton Strous of South Africa, someone I have known a lifetime who works for South African Clothing Industries a rather large South African based clothing manufacturer founded by my step-father Alan Zulman and his best friend Abe Dubin some 58 years ago and whose main business like any clothing manufacturer once their principles figure out how the "real world" works is "over and under invoicing" in the purchasing of fabrics from different countries with most if not all the profit siphoned off into numbered bank accounts but of course where to place such unlaundered monies has changed over the years just as people have had to watch out for who could stab them in the back beginning with Abe Dubin whose main other job besides for hiring the "most average" prodder is getting SACI's fabric providers to overcharge for the fabric allowing for SACI's accountants to send more money out of South Africa than what the fabric actually cost with the fabric mill knowing to then take the "overage" and place it wherever Abe instructed while SACI itself reduced not only the profit for its shareholders but the amount it paid in South African taxes while that untaxed "overage" would then begin earning offshore interest tax free and beyond the reach of any regulator, let alone some fricken dumb ass government regulator keeping track of a country's exports and imports.

Germany is not only the world's largest exporter, it is the world's largest NET exporter.

Who in a million years would believe this?

How many of the best financiers on Wall Street let alone the ignoramuses, the most obscene congregating on Capital Hill, would have thought Germany was even close to the top of the list?

I wager not a single one.

When last did you return to the manufacturer a German made kitchen knife.

The best steel comes out of Germany; this a good number of our wives would know.

What about HP sauce?

Do you think A1 Steak sauce is as good?

Have you even heard of this delicious HP sauce?

Should we continue on this superficial line as you now think more about why Black Hatters and other religious Jewish people don't simply go vegetarian and give up this Kosher nonsense and therefore draw more attention to all their other hypocrisies including putting up with the Black Hatters who are the "cushion" of the

De Beers, the most anti-Semitic institution in the history of the world, rather than look at why US business interests beginning with De Beers headed since the turn of the last century by anti-Semitic Germans, the Oppenheimers and the Engelhards decided to crash the Deutsche Mark so as to steal German industry, beginning with their knowhow resulting in a barrelful of Deutsche Marks not affording a loaf of bread.

Have you noticed every Jewish business person you know feeling not alone right now having all collapsed in to a heap of tears?

My French-Canadian wife that many if not most receiving this communication want to believe is a figment of my imagination, and trust me when I tell you that Marie Dion Gevisser is far more beautiful in the flesh, photos simply don't show off her so natural sexiness, not to mention a mind to also die for said just the other day,

"The more you lie the easier it becomes the more you believe yourself!" before adding quickly, "the easier it is to believe yourself, either way"; and then just quickly moving on to another subject.

I would also listen very carefully to my Jewish mother Zena Badash-Ash Gevisser when she once wrote me on a painted piece of cotton, "It isn't easy to sour like an eagle when surrounded by turkeys" but Zena eventually later in life began subscribing to her own "dreamed up" way of remaining "comfortable" in her little world that had gone through more "up and downs" than she cared to remember with, "I only debate people who agree with me".

In 4 days from now an "old" high school and University of Natal-Kwazulu friend World Champion Surfer 1977 Shaun Tomson

is coming to town for a book signing. Maria Connor of the pitiful Del Mar Times continues, "Shaun Tomson, surfer, businessman, film-maker and author, is participating in an author event at The Book Works, 2670 Via De La Valle, Del Mar June 5 at 7 p.m."

Shaun has lots of truths in his life beginning with both our dads playing rugby together in the Under 13 team

at Durban Boys High School.

It wouldn't have surprised me if his dad was even a better athlete than Bernie Gevisser who was well above average and easily made it through the tough selection to become not only a fighter pilot but a fighter-bomber-pilot at [age 20](#), and very possibly Chunie would have made it as well if he were so motivated, were it not for the fact that his athletic career was cut short when a shark in Durban's Bay of Plenty bit off a chunk of his one upper arm, preventing him from participating in what I believe would have been the 1936 Olympics where according to my dad Shaun's dad would have been a "shoe in".

Shaun and his wife Carla who I don't know as well as Shaun who I really got to know when we began swotting together with a mutual friend David Lazarus for Economic II, I believe it was in our second year at the University of Natal, lost his only young teenager son to a school prank after returning to South Africa presumably to try and follow in Shaun's footsteps, although I very much doubt Shaun was one of those "pushy fathers" which most would agree accurately described Chunie Tomson who to his credit produced a son who has always stood tall, in every respect.

Shaun was never a religious Jewish person and like me married a non-Jewish most beautiful and talented wife whose mother was one of my mother's models.

Shaun, however, is only now coming to grips with the shocking realization of all the lies that have stacked up one on top of the other that even were he to achieve all the financial and non-financial success he may still strive for not only won't bring back his son but he has to now carry the "burden" of being so very "misinformed" and instead of doing something about, deciding to simply do his "thing" since it isn't easy to sour alongside me knowing that I will in all likelihood be very soon spotlighting all [his](#) miserable, selfish friends.

You are first and foremost when defining yourself saying everything about yourself when choosing your friends.

So far there isn't one of Shaun's close personal friends, some I have also known a lifetime who has any intestinal fortitude because they have got so very comfortable with their lies.

Let's now move on to another news story of the day

Prince William To Tackle Drug Smugglers In Caribbean...

Why, he wants bigger cut?

Once informed of the truth such as the selection process in place now for a century, void of merit, that has the most average of us rising to the top of the Bell Shaped curve educational system, and one chooses very poorly to participate in charity events like "Walks for Chron's disease", you do yourself great bodily-mental harm unless you have convinced yourself you are doing it for exercise given how it is an extraordinarily poor allocation of your increasingly less time to contribute to Knowledge-Information-Light-rEVOLUTION – just go to just3ant.com.

Money is not an accurate barometer for merit... not so long as people can steal and get away with it.

Retail therapy... people feel better about themselves when they spend money

A brief history of money creation

<http://www.just3ants.com/dev/why.php>

Mr. President, below is a photo taken in 1960 of President-elect John F. Kennedy and Lyndon Johnson after Charles Engelhard Jr. and Harry Oppenheimer rigged the 1960 Presidential election.

I tore the page out of a magazine I was reading, I believe at my primary physician, Dr. Glenn Soppe who was treating a very deep cut to my left baby finger that is now almost perfectly healed; and thank you for caring.

I must now prepare breakfast for my F-C wife here at our cliff house as this train below is coming through.

PAGE 8 - MAY 16, 2008 - DEL MAR TIMES

IN BRIEF

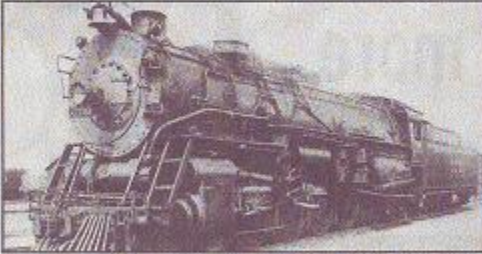

Locomotive viewing party

Train lovers will get a view of the original Santa Fe 3751 steam locomotive as it makes a rare roundtrip excursion from Los Angeles' Union Station to downtown San Diego. The train will come through Del Mar Sunday, June 1, about 10:30 a.m. and again around 2:45 p.m. this par-

ticular engine is the last steam engine pulling a Santa Fe passenger train to stop at Del Mar (August 1953).

To celebrate the occasion, the Del Mar Historical Society is planning a "viewing" party from the outside patio at The Brigantine restaurant from 2 to 4 p.m. The cost is \$15 for excellent viewing of about one mile of right-of-way south of Via de la Valle, free finger-food and a cash

NEWS

bar. There will also be the opportunity to purchase prints of old photographs from Del Mar's railroad

past. Reservations are available at www.delmarhistoricalsociety.org or by calling (858) 794-0029.

History is a terrible time right now for all the world's hypocrites which I don't believe is you or your most beautiful and sexy wife Laura. Please give her another kiss from me.

BTW I get great comfort from this [Michael Boyd](#)'s consistency.

Please let me know when you are next in town.

Again below is a sunset photo taken from our gallery-studio cliff house whose underneath garage, by the way, is now spotless.

Of course I have been once again doing a whole lot of "cutting and pasting", so please provide both edits and comments.

Sincerely,

Gary S. Gevisser

Ps – Marie Dion Gevisser has just arisen letting me know, "There are people sleeping on the cliff!" waiting for the train to pass by.
