**Subject:** Clean Water Fund Project - Re: I have made a note. how are you doing?

Well, I haven't forgotten our ingenious Water Fund project, most of all why it didn't "get off the ground" and it is not simply because of the all important question "who would be in charge" but rather how extraordinarily easy it is for folks like De Beers to corrupt grass roots organizations before they take root.

I made a point of never discussing De Beers with you all, let alone how intimately familiar I was with their agenda, "Take the money now or open a taco stand" given how it would have only had you feeling "defeatest" [sic] which is why immediately upon getting the "white paper" done I pulled out all stops to get [Derrick's](#) uncle Dr. [Jonathan Beare](#) to "step up to the plate" and when I met with him on January 13th, 2005 - and you will recall how you and I discussed you possibly joining me at this most interesting meeting - Jonathan made the "fatal error" of not only "playing dumb", making out that he had no idea why he and I were meeting when we all had in "black and white" a whole bunch of emails including those between [Jonathan](#) and myself and Derrick Beare and myself, not to mention how very enthusiastic was Derrick, BUT to top it off [Jonathan](#) decided to threaten me, someone who does not scare easily.

By now you should have got a copy of my last heavily broadcasted communiqué to a Ms. Grace Osborne, Assistant Director, Global Leadership Institute, UCSD and if not, the hyperlink below will take you to it; not to mention it should also soon be accessible on just3ants.com

<http://www.nextterrestrial.com/pdf/gosborne-blog.pdf>

The Israeli Military Intelligence report along with the FBI now "publicly" investigating this very easy to understand Military Intelligence report of all time that shows the culpability of the US Government backed by the world's biggest business interests all led by De Beers, is going to allow us to spotlight so much easier each and every individual from the bottom up and top down who would be so very foolish to even try going forward to corrupt grass roots organizations like the ones we envisioned for our Water Fund project.

Now remember, not only did I not get off a boat just yesterday in Haifa harbor, Israel I perfectly understand why even you may not be really all that interested in seeing our Water Fund project take off, certainly I doubt very much your interests

are as pure as mine, given how I am more than willing to give up my life towards such an easily achievable goal.

You should also remember that the direction we are heading in right now is going to be "lights out" for all of us much sooner than you would have expected, and the IMI report says it all rather well as well the fact that poor people in places like Peru who know perfectly well why local law enforcement have beautiful uniforms with the Coca Cola emblem embroidered over the left breast pocket.

Rod, a lot has changed over the past going 4 years since we first starting working on this; not to mention our involvement with the Wetherly Capital Water Fund aka California Agricultural Fund; to mention little of your meeting with Governor Gray Davis on December 28th, 2001.

Come and visit with Marie and me and you won't even need to "stand tall" to get the most magnificent view of the Pacific Ocean from our most awesome studio cliff house.

All the best,

Gary
